DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-36 and 58-106, drawn to creation of a secured streaming container, classified in class 713, subclass 189.
 - II. Claims 37-70, and 107-132, drawn to accessing portions/segments of a secured streaming container, classified in class 713, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I involves creation of a secured streaming container through use of encryption and invention II is directed towards accessing portions/segments of a secured streaming container while the other remaining portions/segments remain secure which has separate utility. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
